

HOW TO USE PRODUCT VARIATIONS

WHEN ADDING MULTIPLE PRODUCT OPTIONS

First things first;

1. Please contact us with the variables that you need added – only admin can do this.

For example:

- Print Size: list the print sizes you need
- Colours: list the colours
- Mediums: add the list of mediums etc.
- Metals: list of the meta variations
- Etc. etc.

2. When adding or editing the product - Select Variable Product

The screenshot shows a 'Product Type' dropdown menu with 'Variable product' selected. Below the dropdown are tabs for 'General', 'Inventory', 'Shipping', 'Linked Products', 'Attributes', and 'Variations'. At the bottom, there are 'Save Changes' and 'Save Draft' buttons.

3. Go to Attributes and add an attribute

Remember to complete **step 1** if you haven't done so already.

The screenshot shows the 'Attributes' tab selected. A dropdown menu is open, showing options to 'Select an attribute' and 'Add'. The dropdown menu lists 'brand', 'colour', 'RING SIZE', and 'SHIRT SIZE'. There are 'Expand / Close' buttons on the right and 'Save Changes' and 'Save Draft' buttons at the bottom.

4. Choose your variations – and follow steps highlighted in the below image

Product Type
Variable product

General Inventory Shipping Linked Products **Attributes** Variations

Select an attribute Expand / Close
colour

Visible on the product page
 Used for variations

Value(s):

Expand / Close

check both boxes

select the variations

save and scroll back down

5. Save the changes and scroll down – the select Variations
